A30-Music Stand Light

Superlites

[57 LEDs with Wider Lighting] 57 advanced LED beads are scientifically distributed on the 11in/28cm long light bar, which provides a brighter and more evenly spread light with a clearer view when you are performing. Our music stand lamp gives you a wider range of lighting to cover all pages of your sheet music, including page edges. It is the obvious choice for your better instrument practicing.

[3 Colors & 5 Brightness Stepless Adjustable] Unlike other piano lights, our music stand light has a unique eye-caring amber mode (1800k) to prevent eye strains. The color temperature ranges from 1800K to 6000K with 20 lumens to 200 lumens brightness levels for any occasion. It always can illuminate adequate lighting for both outdoor & indoor performances. This piano light is your ideal practicing aid.

[Built in 4000mAh Battery] This piano lamp is USB-C rechargeable, charging in a faster & safer way. It has a built-in HUGE 4000mAh battery capacity. You can use it for up to 10 Hrs (Brightest mode) to 140 Hrs (Dimmest mode) with no hunt for chargers, which keeps you away from everyday charging hassles. The battery quality is guaranteed by a certified safety sheet (MSDS) for your safe usage. Look no further for your perfect piano light.

[Clip-on & Stand-alone Design] The clamp of this music stand light widely opens about 1.4 inches (35mm), it can securely & tightly clip on the music stand or stably stand on the piano's music desk. Plus, the anti-slippery soft pads in between the clips will protect any surface from getting scratched or pinched. The features of the light make it a perfect podium light for stages, or a table lamp for studying. A versatile music light meets all your needs.
