

Caravaggio P1

Superlites

Caravaggio is a series of metal pendants with an eye-catching high gloss lacquer. The suspension technology is masculine in construction, creating the right counterbalance to the shade's feminine lines. Caravaggio is characterised by direct light without glare. The uplight from the pendant's top also adds to the room's ambient light. Caravaggio is suitable for interior design in cafés, restaurants, retail shops and private homes.

Caravaggio is also available as floor and table lamp
