

# GLS-ZO-C-D2W-6W-ES

**Superlites**

This decorative, ultra-dimmable LED filament light bulb is fitted with top, industry-rated Dim-to-Warm technology.

At 6W this lamp provides a cost-effective equivalent to 45W incandescent lightbulb. Using latest Dim-to-Warm technology this lamp reduces the colour temperature as it dims from warm white 2800K to the ambient 2000K temperature that resembles candlelight.

With high CRI of 90, flicker-free technology and a smooth dimming curve this lamp allows for an easy transition from daytime to evening activities, perfectly mimicking the warm atmosphere associated with the traditional incandescent and halogen lamps.

The traditional shape of this GLS lamp makes it a great option for all around lighting from work to social venues and home.

6W

Wattage Equivalent: 45W

530lms

2000k - 2800k

Dimmable

E27/ES

CRI: 90
