Micro Spike Spot Glare Guard

Superlites

The Micro Spike Spot with Glare Guard is a miniature low-voltage dimmable outdoor spotlight, with a 100mm spike for installing into soil. Ideal for planters and larger pots and illuminating small trees, simply plant and orient.

Precision machined in marine grade 316 stainless steel or copper, the luminaire achieves IP68 water ingress rating for peace of mind.

The Cree 1 watt max LED can be easily replaced if required or substituted for a colour LED. The optic is also simple to change if you wish to alter the beam width.
