

We took the classic directional downlight and gave it a Tala LED makeover.

Designed with a highly effective anodised aluminium heatsink, and complete with 3000-2000K Dim to Warm behaviour, the Tala GU10 delivers 600 lumens with gallery-grade colour rendering at CRI 95 (R9 90)

Ideal for kitchens, bathrooms and hallways, our version of the downlight provides warm, ambient light in the form of a typical high-street light source
Compact shape and size
