

# Porte Suspended

Superlites

Porte immerses us in a playful world by fusing fresh colours, bright finishes and clean shapes. The harmonious connection between the head and the base, crossed by a delicate stem, reflects balance and mobility. This head, as an independent main element, is combined with various supports to allow four types of installation and adaptations, thus satisfying any need.

Not only does it allow for position and height adjustments, but it also achieves a perfect combination of simplicity and personality adding a distinctive touch to any environment, transforming it into an intimate and warm space.

# Porte Suspended

**Superlites**

Porte stands out as a high performance portable luminaire, designed for both indoor and outdoor use (IP43). It offers the convenience of dimming the luminous flux in three levels and adjusting the colour temperature by means of a push button integrated in the head.
