

The TR7226 is a slim up/down light with a shallow projection of just 75mm from the wall. This light works well in medium to large rooms and spaces, and is ideally suited to use in bedrooms and stairwells, where a slim projection is desirable. Supplied with this luminaire is a clear, frosted diffuser, designed to be fitted on at the bottom of the light, obscuring the fitting's innards, reducing glare and also softening and diffusing the light.

Linear, crisp, contemporary design.

Class 2

IP20

230v-240v
