

TO-7280-GU10

A compact up/down light, square in cross section and with a width/depth of just 125mm. It's delicate proportions make it ideally suited to smaller rooms and spaces.

Supplied with this luminaire is a clear, frosted diffuser, designed to be fitted on at the bottom of the light, obscuring the fitting's innards, reducing glare and also softening and diffusing the light.

Versatile low energy light source Corner mounting option

Linear, crisp, contemporary design.

Corner mounting option

Class 2

IP20

230v-240v
