Tolomeo Micro Table

Superlites

The design of the Tolomeo is characterized by clean and minimalist lines, with a structure made of aluminum. This material gives the lamp not only a modern and sophisticated look but also remarkable lightness and robustness. The lamp head, adjustable in all directions, is equipped with a stamped aluminum reflector that ensures uniform light distribution, making it ideal for various lighting needs.

Tolomeo Micro is the smallest version of the iconic design lamp, with every element proportionally reduced to make it more compact and suitable for small spaces. Additionally, this version stands out for its vibrant and playful colours.
